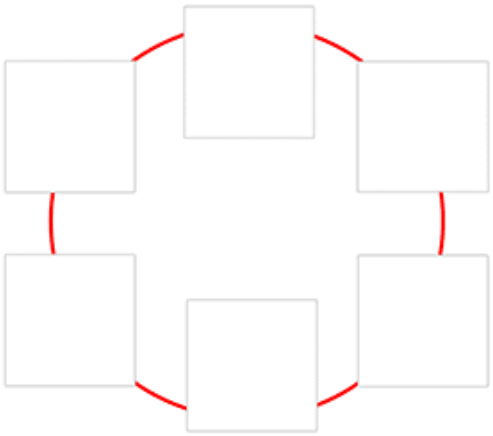
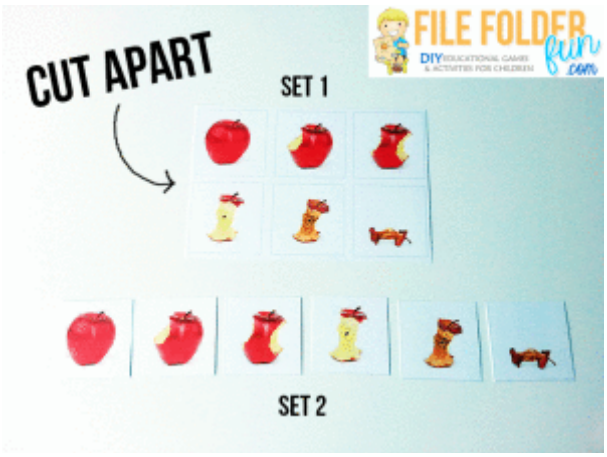
Our Sequencing games are printable games where children put the cards in the proper order or sequence. This order can be based on Size, Time, Shape and more.

Many of our sequencing printables can be combined to fit inside a file folder to create a complete learning center.



How to Play: Print up our blank Sequencing Chart to use with our entire collection of photo sequencing cards. This chart can be laminated and stored in your learning center, then simple give children each set of photo cards to place in the appropriate boxes.



Alternatively, each game prints up two sets of cards. You can use the first set as a game board, and cut out the second set for playing pieces. This is good for introducing children to the proper order first. You can mount multiple game boards inside a file folder and store the game pieces with a paper clip. As children master the sequence introduce the blank chart and save the game boards for self check references.
